DETAILED ACTION

Claims 6-11 and 13-15 have been cancelled. The active claims are 1-5 and 16-19 of which claims 1, 16, 18 and 19 are independent claims.

In view of the amendment, the 112, 2nd paragraph rejection is withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Richter (USP 5,623,490).

Details of the rejection have already been set forth in the last Office action. The details are incorporated herein by reference thereto.

Response

Applicants contend for patentability that components 708, 710 and 712 in Figure 7A of Richter are not schedulers. The Examiner disagrees. Applicants recite a scheduler for assigning priority information to received data packets. Components 708-712 clearly are recited for generating packets with priority as indicated in Figure 7A of Richter. Although Applicants' claims recite a scheduler, Applicants' scheduler is not for scheduling. Rather, similar to Richter's components, Applicants' scheduler is for

assigning priority to packets. Richter therefore teaches Applicants' scheduler which is for assigning priority to packets.

As to the storing of links to the data packets in a pointer memory, the links to the data packets are nothing more than a memory address register for generating memory addresses to access the packets stored in the memory. Such an address register is well known in the art and is inherent in memory accessing. In Richter, the packets are assigned with priority by components 708-712. The packets are stored in a queue 714 in order of priority. The pointer to the queue is the link for pointing to the locations of the queue for accessing the packets from the queue in the priority order.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
